

INSTALLATION INSTRUCTIONS

for 367031 Drain Protector

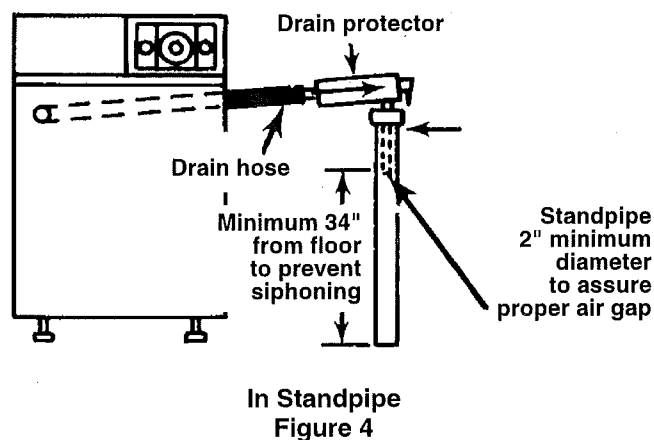

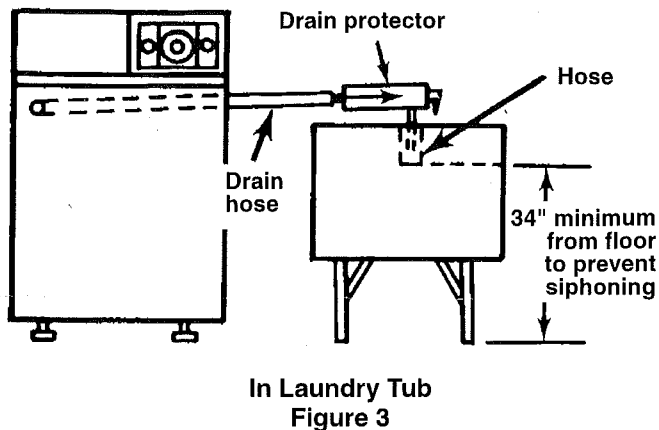

Instructions:

1. For installation, see Figure 1 for use with a rubber drain hose or Figure 2 for use with a corrugated or plastic drain hose.

NOTE: We recommend using a short piece of drain hose (approximately 6") on the outlet end of the drain protector.

2. See Figure 3 for laundry tub installation or Figure 4 for standpipe installation.

NOTE: The drain protector will require periodic cleaning. Unlatch the cover and remove the element for cleaning. Make sure the cover is tightly closed and latched after cleaning.
