

INSTALLATION INSTRUCTIONS

Door Spring Kit

Kit contains:

- 1 Instruction sheet
- 1 Door counter balance spring
- 1 Retainer
- 1 Protector

Before mounting the spring to the door, the retainer must be put into the door counter balance spring.

Pre-Assembly Steps

1. Push protector on the end of the retainer. See Figure 1.
2. Put the long end of the retainer into either end of the door counter balance spring. See Figure 1.
3. Hook the loop end of the retainer over the hook on the door counter balance spring. See Figure 1.

The spring assembly is now ready to mount to the door support.

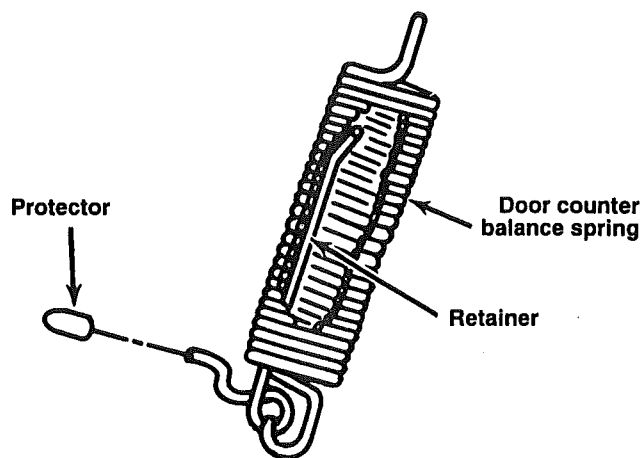

Figure 1

⚠ WARNING

Electrical Shock Hazard Disconnect power before servicing. Replace all panels before operating. Failure to do so can result in death or electrical shock.

To mount the assembly

1. Disconnect power or unplug dishwasher.
2. Mount the end (without the retainer) of the door counter balance spring into the slot or hole on the door support. See Figure 2.
3. Keep tension on the retainer by holding it. Put the exposed end into one of the notches. See Figure 2.
4. Adjust the door counter balance spring so the door closes easily without slamming.
NOTE: The door adjustment is done by changing the retainer from one notch to another.
5. Replace all panels which were removed and reinstall dishwasher.
6. Reconnect power or plug in dishwasher.
